

# Viega Project Profile

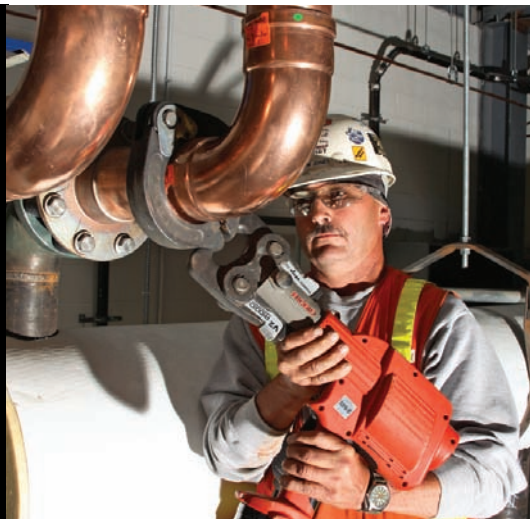

NO. 112

“The Viega ProPress® System saved us several hundred man hours.”

*James Jones, Project Superintendent, Brandt Engineering Corp.*

*Brandt Engineering, Texas' largest air conditioning, electrical, and plumbing service provider, offers value-conscious solutions like the Viega ProPress System to speed installation, increase productivity, and cut labor costs.*

*The ProPress System is the fastest, most reliable, flameless way to join copper tubing.*

## CHALLENGE

Striving to meet the increasing health care needs of the growing communities around Arlington, Texas, Arlington Memorial Hospital began construction of a new surgical tower. Increasing the hospital's size by more than 200,000 square feet the surgical tower needed to go up quickly with little disruption to the existing hospital.

## SOLUTION

Familiar with the time savings of Viega ProPress®, the ProPress System was specified for the job. “We had seven tools, fourteen guys, and worked in crews of two,” stated James Jones, Brandt Engineering Project Superintendent. “People were putting up hangers first and guys were running copper pipe behind them. It took longer to put the hangers up than put the pipe in.” Selecting ProPress for all 2-1/2” to 4” copper water lines enabled the job to run ahead of schedule. “ProPress is quick, easy, and a lot less hassle,” said Jones.

## RESULTS

Jones estimates ProPress saved Brandt Engineering several hundred man hours and credits their being ahead of schedule to the speed and reliability of the ProPress System. “It's the wave of the future,” said Jones.
