

# Viega Project Profile

NO. 117

## “ProPress® means efficiency”

*Dan Braun, Nelson Stark*

*The Nelson Stark Company sets itself apart by utilizing Viega's press technology - the fastest, most reliable way to join copper tubing.*

*Children's Hospital Medical Center is building a new, 11-story research facility on its main campus in Cincinnati.*

### CHALLENGE

Cincinnati's most well-known and respected pediatric hospital has undergone several physical expansions to both renovated and newly constructed facilities. Eager to expand on their research capabilities the hospital decided to construct a new 363,000 square-foot research space. Nelson Stark Company is faced by a tight time table to finish the plumbing portion of the facility.

### SOLUTION

“If there is ever a way to do things in less time, we want to know about it,” said Dan Braun with Nelson Stark. “We saw ProPress as a timesaver.” Utilizing Viega ProPress fittings for 1/2” - 4” water lines and ProPressG™ fittings for 1/2” - 2” gas lines, Braun finds Viega's press system is a faster and safer alternative over the traditional and time-consuming method of soldering. Braun touted the benefits of ProPress saying, “It's fast, it's easy, and it gets the job done.”

### RESULTS

“Our plumbers embrace the system. A few worry about it taking their jobs or dumbing down the industry but after they use it they see the benefits,” said Braun. Only Viega offers the patented Smart Connect™ Feature allowing installers to quickly identify unpressed fittings. Testing has gone so well Dan Braun states, “We've had no leaks.”
