

Viega Project Profile

NO. 114

“They stand by their products; I trust Viega products.”

Vaughan Latham, Industrial Ventilation Specialist, J.O. Mory Inc.

J.O. Mory Inc., a visionary in the industry for 115 years, has gotten on board with ProPress®. Now J.O. Mory is looking at purchasing more tools.

FostaPEX™ was chosen for the radiant tubing portion of the job because of its flexibility and form stability.

CHALLENGE

Hired to finish the office portion of LaVanture Products because the existing contractor couldn't keep up with the schedule, J.O. Mory wanted to exceed the building owner's expectations.

SOLUTION

Appreciating Viega's complete systems approach, J.O. Mory installed Viega ProPress® in the boiler room, warmed the sidewalks with Viega's S-NO-Ice™ System, and heated the office area with Viega ProRadiant. "I've always had good support from Viega. I have a strong working relationship with the local Viega district manager and feel comfortable using their products," said Vaughan Latham. Design assistance was critical and another reason why J.O. Mory chose Viega. With outstanding customer support, utilization of Viega Radiant Wizard software, and follow-up training at Viega's Educational Facility in Nashua, NH, installation of all Viega products was extremely cost-efficient.

RESULTS

No other manufacturer could offer the quality products, technical assistance, and partner support delivered on the LaVanture Products jobsite. "We saved a lot of time using Viega's products," said Latham.
