## MANAPAC Instructions

The MANAPAC is designed to simplify MANABLOC installations by providing the contractor an easy way to install ViegaPEX tubing from a disposable plastic reel.

Mounting the MANAPAC reels is quick and easy. Simply utilize a piece of "scrap" pipe or tubing from the jobsite that is no more than 1 1/4" in diameter and long enough to extend across 3 studs in the framed wall (approx. 32"). Support tubing must be strong enough to support both reels, which weigh approximately 27.5 lbs. each for the 3/8" tubing reel or 22.5 lbs. each for the 1/2" tubing reel. Each MANAPAC reel measures approximately 18" in diameter by 12" wide.

1. Slide support tubing through both reels
2. Align in adjacent stud cavities
3. Lift reels into place and anchor support tubing at both ends and the middle stud, with a J-clamp or appropriate fastener.
